Scholar

Step 1: Profile Step 2: Articles Step 3: Updates

Track citations to your publications. Appear in Google Scholar search results for your name.

Name

Use your full name as it appears on your papers. For example: Margaret Mead

Affiliation

For example: Professor of Computer Science, Stanford University

Email for verification

Use an email address at your institution. For example: youname@mit.edu

Areas of interest

For example: Artificial Intelligence, Conservation Biology, Pricing Theory

Homepage

For example: <http://example.edu/~youname>

Step 1: Profile Step 2: Articles Step 3: Updates

- • We'll use a statistical authorship model to identify new articles that you write. We may also update bibliographic information for articles in your profile or identify duplicate article entries, which could be merged or deleted. How would you like to handle these changes?
- Automatically update the list of articles in my profile. *(recommended)*
- Don't automatically update my profile. Send me email to review and confirm updates.
- • You can also add and remove individual articles, update their bibliographic data, and merge duplicate records. Rest assured, our automatic updates will preserve your edits and will not override them.
- • We'll collect and display citations to your articles from all of Google Scholar. The citations will update automatically to reflect changes in your profile and in Google Scholar.
